

1. Record Nr.	UNINA9910135767303321
Titolo	ANSI/IEEE Std C62.2-1987 : IEEE Guide for the Application of Gapped Silicon-Carbide Surge Arresters for Alternating Current Systems // IEEE Power Engineering Society Surge Protective Devices Committee, IEEE Standards Board, American National Standards Institute
Pubbl/distr/stampa	Piscataway : , : IEEE, , 1989
ISBN	0-7381-3016-8
Descrizione fisica	1 online resource (56 pages)
Disciplina	621.317
Soggetti	Electric apparatus and appliances - Protection Transients (Electricity) - Standards Electric power system stability - Standards Silicon carbide - Electric properties Electric currents, Alternating
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This standard covers the application of gapped silicon-carbide surge arresters to safeguard electric power equipment against the hazards of abnormally high voltage surges of various origins. Such overvoltages may cause flashovers and serious damage to equipment, thereby jeopardizing the supply of power to users. It is essential to prevent this by the proper coordination of surge protection devices with the insulation strength of the protected equipment.
