

1. Record Nr.	UNINA9910135783103321
Titolo	ANSI N42.16-1986 : American National Standard Specifications for Sealed Radioactive Check Sources Used in Liquid-Scintillation Counters // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	New York, New York : , : IEEE, , 1986
ISBN	0-7381-4152-6
Descrizione fisica	1 online resource (12 pages)
Disciplina	620.193
Soggetti	Carbon composites Composite materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Specifications are given for carbon 14, tritium, and background check sources in toluene-based scintillators. Use of these materials is sufficient to verify the stability of counting efficiency and background of liquid- scintillation counting systems as outlined in ANSI N42.15-1980. This standard specifies the solvent, the organic scintillator solutes, the purging gas, the radioactive material, and the container appropriate for preparation of check sources.
