

1. Record Nr.	UNINA9910135787403321
Titolo	ANSI/IEEE Std 575-1988 : IEEE guide for the application of sheath-bonding methods for single-conductor cables and the calculation of induced voltages and currents in cable sheaths // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, New Jersey : , : IEEE, , 1987
ISBN	0-7381-4231-X
Descrizione fisica	1 online resource
Disciplina	690.0218
Soggetti	Standards, Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The guide describes the most common sheath-bonding systems now in use and the methods of calculating sheath voltages and currents, particularly as applied to three-phase systems operating at 60 kV and above, with the neutral grounded directly or through an impedance. The user is cautioned to make sure that a design does not contravene any local or national regulations.
