| Note generali | Unabridged. |
| Sommario/riassunto | Star light, star bright, what will I find over the rainbow? Take a tour of the summer skies of the day and night. Starry starry nights, stormy and sun-filled days. Long summer days of picnics and ballgames are played out under a vast and gorgeous canvas of astronomical and meteorological curiosities. From the stories of the stars told by the ancients, to a recent mammatus cloud over CitiField in New York, learn about the phenomena in the summer skies that keep us looking up. Co-host: Joe Rao: meteorologist for News 12 Westchester, New York. |
