

1. Record Nr.	UNINA9910135888003321
Titolo	IEEE Std 1129-2014 : IEEE Guide for Online Monitoring of Large Synchronous Generators (10 MVA and Above) // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2014
ISBN	0-7381-9019-5
Descrizione fisica	1 online resource
Disciplina	536.5
Soggetti	Temperature measurements Synchronous generators
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The guidelines for online monitoring of large synchronous generators are described in this guide. High-level discussions of each of the proposed monitoring methods, and recommended threshold values, whenever there is a general agreement on those values, are included in this standard. Instrumentation that is clearly understood to belong to the protection scheme of the generator (e.g., differential protection) is not covered by this guide.
