

1. Record Nr.	UNINA9910135890603321
Titolo	IEEE Std 1332-1998 : IEEE Standard Reliability Program for the Development and Production of Electronic Systems and Equipment // IEEE
Pubbl/distr/stampa	New York, USA : , : IEEE, , 1997
ISBN	0-7381-1411-1
Descrizione fisica	1 online resource (12 pages)
Disciplina	621.381
Soggetti	Electronic apparatus and appliances Electronic systems IEEE Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Guidance for providing products that satisfy the customer is given. This standard guides suppliers in planning a program that suits their design philosophy, the product concept, and the resources at their disposal, so that every activity adds value. This standard encourages suppliers and customers to cooperatively integrate their reliability processes. Requirements are written to properly establish the contractual or obligatory relationship between the supplier and customer in a product program.
