

1. Record Nr.	UNINA9910135980403321
Titolo	IEEE Std 428-1981 : IEEE Standard Definitions and Requirements for Thyristor AC Power Controllers // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1981
ISBN	0-7381-4371-5
Descrizione fisica	1 online resource
Disciplina	621.3137
Soggetti	Thyristors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	These recommendations apply to thyristor ac power controllers that are low voltage, power electronic, industrial class equipment for the control or switching of ac power. Switching, multicycle control and phase control are included. Cycloconverters are excluded. Examples of application include, but are not limited to, industrial oven controls, static motor starters, static relays, etc. This standard is intended to be used in conjunction with IEC Pub 146 (1973) [2] .I Reference is made to the appropriate section of IEC Pub 146 (1973) [2] where required.
