

1. Record Nr.	UNINA9910136011803321
Titolo	IEEE Std 1812-2014 : IEEE Trial-Use Guide for Testing Permanent Magnet Machines / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway : , : IEEE, , 2015
ISBN	0-7381-9469-7
Descrizione fisica	1 online resource (56 pages)
Disciplina	621.46
Soggetti	Permanent magnet motors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Contained in this trial-use guide are instructions for conducting tests to determine the performance characteristics and machine parameters of permanent magnet (PM) machines. The tests described may be applied to motors and generators, as needed, and no attempt is made to partition this guide into clauses applying to motors and clauses applying to generators. It is not intended that this guide shall cover all possible tests, or tests of a research nature, but only those general methods that may be used to obtain the performance data and machine parameters. The schedule of factory and field tests, which may be required on new equipment, is normally specified by applicable standards or by contract specifications. This guide should not be interpreted as requiring any specific test in a given transaction or implying any guarantee as to specific performance indices or operating conditions. The term specified conditions for tests as used in this guide will be considered as rated conditions unless otherwise agreed upon. Rated conditions apply usually to the quantities listed on the machine nameplate.
