Sommario/riassunto	The sociology of sports in the Middle East has been neglected compared to other world regions. This volume aspires to encourage a greater focus on this topic. Papers in this volume deal with the relation between organized sports and fans, with the special place of youngsters and women in sports, or with the role of sports in a more general understanding of culture and society as indicators of modernization and other facets of social change. Sportive competitions arouse keen passions around such issues as gender, class, and nationality, while they raise questions about leadership on and off the field, and about the economic impact of the games.
