Sommario/riassunto	This book is a comprehensive guide designed to test and reinforce mathematical skills in various numerical ranges. It includes a series of tests focusing on arithmetic operations up to 1,000, 10,000, and 100,000, as well as rounding and calculating with numbers up to

1,000,000. The book also covers topics such as diagrams, combinatorics, and measurements of lengths. It aims to provide students and educators with a structured approach to mastering mathematical concepts through practical exercises. The book is likely intended for learners and educators seeking to improve mathematical proficiency in primary or early secondary education settings.
