Livello bibliografico	Monografia
Sommario/riassunto	This book offers comprehensive learning aids for students in the fifth grade at a German Gymnasium, focusing on arithmetic and word problems. It covers topics such as natural numbers, arithmetic operations, powers of ten, rounding, addition, subtraction, multiplication, division, and the properties of numbers. The book introduces students to concepts like number lines, large numbers, and number sets, and includes exercises to practice these concepts. It aims to enhance mathematical understanding and problem-solving skills, making it an ideal resource for educators and students seeking to solidify their foundational knowledge in mathematics.
