

1. Record Nr.	UNINA9910136095003321
Autore	Mack Alison
Titolo	Global health impacts of vector-borne diseases : workshop summary / / Alison Mack, rapporteur ; Forum on Microbial Threats, Board on Global Health, Health and Medicine Division, the National Academies of Sciences, Engineering, Medicine
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2016 ©2016
ISBN	0-309-37762-5 0-309-37760-9
Descrizione fisica	1 online resource (397 pages) : illustrations (some color)
Disciplina	616
Soggetti	Communicable diseases - Prevention Communicable diseases - Epidemiology Emerging infectious diseases Animals as carriers of disease
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	"In June 2007 the Forum on Microbial Threats hosted a workshop to explore the dynamic relationships among host, pathogen(s), vector(s), and ecosystems that characterize vector-borne diseases. Revisiting this topic in September 2014, the forum examined trends and patterns in the incidence and prevalence of vector-borne diseases in an increasingly interconnected and ecologically disturbed world, as well as recent developments to meet these dynamic threats. This public workshop featured invited presentations and discussions that described the emergence and global movement of vector-borne diseases, considered research priorities for understanding their biology and ecology, and assessed global preparedness for and progress toward their prevention, control, and mitigation."--
