Sommario/riassunto

This title presents a concise summary of alternatives to the court adjudication of disputes. It provides an on-point discussion that facilitates an understanding of the wide variety of options available that can better suit a client's needs, such as negotiation, mediation, arbitration, and various hybrids such as arbitration-mediation, mediation-arbitration, and consensus-building, as well as court-connected processes. Particular attention is focused on the legal and

ethical issues associated with negotiation, mediation, and arbitration.
Each chapter contains a bibliography.
