Sommario/riassunto	The Ming dynasty (1368-1644), a period of commercial expansion and cultural innovation, fashioned the relationship between state and society in Chinese history. This unique collection of reworked and heavily illustrated essays, by one of the leading scholars of Chinese history, re-examines this relationship. It argues that, contrary to previous scholarship, it was radical responses within society that led to a 'constitution', not periods of fluctuation within the dynasty itself. Brook's outstanding scholarship demonstrates that it was changes in commercial relations and social networks that we

Sommario/riassunto	Environmental criminology is a term that encompasses a range of

overlapping perspectives. At its core, the many strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime, and a conviction that careful analyses of these environmental influences are the key to the effective investigation, control, and prevention of crime.
