

1. Record Nr.	UNINA9910136143803321
Autore	Douglas Kenneth (Physics professor)
Titolo	DNA nanoscience : from prebiotic origins to emerging nanotechnology // Kenneth Douglas, Department of Physics, University of Colorado- Boulder, USA
Pubbl/distr/stampa	New York, N.Y. : , : CRC Press, , [2017] ©2017
ISBN	1-315-35140-4 1-315-36837-4 1-4987-5013-3
Descrizione fisica	1 online resource (457 pages) : illustrations (some color)
Disciplina	572.8/6
Soggetti	DNA DNA - Analysis Molecular evolution Evolutionary genetics Nanotechnology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Part I. The story line and its underpinnings -- Part II. The emerging technology : nanomaterials constructed from DNA -- Part III. The possible origins of life's information carrier.
