Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	pt. I. Donor conception, secrecy and anonymity -- pt. II. Regulatory approaches around the world -- pt. III. Anonymity or openness? -- pt. IV. Conclusion.
Sommario/riassunto	This book examines donor-conception and the search for information by donor-conceived people. It details differing regulatory approaches across the globe, including those that provide for 'open-identity' or anonymous donation, or that take a 'dual-track' approach. In doing so, it identifies models regarding the recording and release of information about donors that may assist in the further development of the law, policy, and associated practices.
