

1. Record Nr.	UNINA9910136279103321
Autore	Jonathan E Suk
Titolo	Dual-use life science research and biosecurity in the 21st century [[electronic resource] ] : social, technical, policy, and ethical challenges // edited by Jonathan E. Suk, Kathleen M. Vogel and Amanda Jane Ozin
Pubbl/distr/stampa	Frontiers Media SA, 2015 France : , : Frontiers Media SA, , 2015
ISBN	9782889195688 (ebook)
Descrizione fisica	1 online resource (95 pages) : illustrations, charts, maps
Collana	Frontiers Research Topics
Disciplina	570
Soggetti	Social Welfare & Social Work - General Social Welfare & Social Work Social Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	In September 2011, scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research, but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus (hereafter referred to as the H5N1 virus) that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility: the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response, a series of international discussions on the nature of dual-use life science arose. These discussions addressed the complex social, technical, political, security, and ethical issues related to dual-use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives.
