

1. Record Nr.	UNINA9910136315703321
Titolo	IEEE Std 268-1973 (Revision of IEEE Std 268-1966) : IEEE Recommended Practice for Units in Published Scientific and Technical Work / / IEEE
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 1973
ISBN	1-5044-0239-1
Descrizione fisica	1 online resource (20 pages)
Collana	IEEE ; ; 268-1973
Disciplina	530.8
Soggetti	Units of measurement Measurement - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In this period of transition, authors and editors of scientific and engineering literature sometimes need basic information on the International System of Units (the Metric System), described in this standard. This contains the units, supplementary units, and multiplier prefixes of the International System, along with instructions for their correct use. Numerous examples are given. Conversions between the International and the British-American System are also discussed, and a procedure is described for rounding after such conversions. Three appendixes define the International System base units, list conversion factors, and explain the work of the International Bureau of Weights and Measures.
