

1. Record Nr.	UNINA9910136316003321
Titolo	IEEE Std 1505.3-2015 : IEEE Standard for the Universal Test Interface Framework and Pin Configuration for Portable/Benchtop Test Requirements Utilizing IEEE 1505(TM) Receiver Fixture Interface Standard // IEEE
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 2016
ISBN	1-5044-0663-X
Descrizione fisica	1 online resource (29 pages)
Collana	IEEE ; ; 1505.3-2015
Disciplina	681.2
Soggetti	Interface circuits Electric connectors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Portable/benchtop test equipment applications are supported in this document by defining a mass interconnection scheme and pin configuration based upon IEEE Std 1505(TM)-2010 and IEEE Std 1505.1 (TM)-2015. Particular emphasis has been placed on defining a more specific set of performance requirements than is defined by IEEE Std 1505-2010 and IEEE Std 1505.1-2015. These performance requirements are in the areas of the pin configuration, specific connector modules, and respective contacts.
