

1. Record Nr.	UNINA9910136372603321
Titolo	ASA C37.12-1952 : ASA American Standard Guide Specifications for Alternating Current Power Circuit Breakers // IEEE
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 1951
ISBN	1-5044-0479-3
Descrizione fisica	1 online resource
Disciplina	621.317
Soggetti	Electric circuit-breakers Electric currents
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	These specifications are intended as a reference for purchasers and users of circuit breakers in the preparation of requests for quotations and as a reference for manufacturers and vendors in submitting bids. These specifications apply to all types of alternating-current power circuit breakers (indoor and outdoor) having an interrupting rating of 50 mva or higher and a voltage rating above 1500 volts. Individual clauses apply to all types except where otherwise indicated. These requirements of necessity include some elements of construction and materials, but are not intended to preclude ingenuity of design or improvement.
