|-------------------------|---|
| 1. Record Nr.           | UNINA9910136394903321   |
| Autore                  | Ben-Daya M (Mohamed)  |
| Titolo                  | Introduction to maintenance engineering : modeling, optimization, and management // Mohamed Ben-Daya, Uday Kumar, D. N. Prabhakar Murthy  |
| Pubbl/distr/stampa      | Chichester, England : , : Wiley, , 2016<br>©2016  |
| ISBN                    | 1-118-92642-0<br>1-118-92658-7<br>1-118-92659-5   |
| Descrizione fisica      | 1 online resource (817 p.)  |
| Disciplina              | 620.0046  |
| Soggetti                | Maintenance   |
| Lingua di pubblicazione | Inglese   |
| Formato                 | Materiale a stampa  |
| Livello bibliografico   | Monografia  |
| Note generali           | Description based upon print version of record.   |
| Nota di bibliografia    | Includes bibliographical references at the end of each chapters and index.  |
| Nota di contenuto       | Title Page; Table of Contents; Preface; Acknowledgments; Abbreviations; 1 An Overview; 1.1 Introduction; 1.2 Classification of Engineered Objects; 1.3 Performance of Engineered Objects; 1.4 Maintenance; 1.5 Evolution of Maintenance; 1.6 Focus of the Book; 1.7 Structure and Outline of the Book; Review Questions; Exercises; References; Part A: Maintenance Engineering and Technology; 2 Basics of Reliability Theory; 2.1 Introduction; 2.2 Decomposition of an Engineered Object; 2.3 Functions, Failures, and Faults; 2.4 Characterization of Degradation; 2.5 Reliability Concept and Characterization<br>2.6 Linking System and Component Failures<br>2.7 Reliability Theory; 2.8 Summary; Review Questions; Exercises; References; 3 System Degradation and Failure; 3.1 Introduction; 3.2 Failure Mechanisms; 3.3 Classification of Failure Mechanisms; 3.4 Dynamic Nature of Stress and Strength; 3.5 Degradation of Products and Plants; 3.6 Degradation of Infrastructures; 3.7 Failure Mechanisms and Maintenance; 3.8 Summary; Review Questions; Exercises; References; 4 Maintenance - Basic Concepts; 4.1 Introduction; 4.2 Types of Maintenance Actions; 4.3 Preventive Maintenance Actions |

4.4 Corrective Maintenance Actions  
4.5 Design Out Maintenance; 4.6 Uptime and Downtime; 4.7 Warranty and Maintenance; 4.8 Maintenance of Products; 4.9 Maintenance of Plants and Facilities; 4.10 Maintenance of Infrastructures; 4.11 Effective Maintenance; 4.12 Summary; Review Questions; Exercises; References; 5 Life Cycle of Engineered Objects; 5.1 Introduction; 5.2 Life Cycle Concept and Classification; 5.3 Standard Objects; 5.4 Custom-Built Objects; 5.5 Reliability: Product Life Cycle Perspective; 5.6 Life Cycle Cost; 5.7 Summary; Review Questions; Exercises; References  
6 Technologies for Maintenance  
6.1 Introduction; 6.2 Technology - An Overview; 6.3 Assessing the State (Condition) of an Item; 6.4 Sensors; 6.5 Testing Technologies; 6.6 Data-Related Technologies; 6.7 Technologies for Maintenance of Products; 6.8 Technologies for Maintenance of Plants; 6.9 Technologies for Maintenance of Infrastructures; 6.10 Summary; Review Questions; Exercises; References; 7 Maintainability and Availability; 7.1 Introduction; 7.2 Maintainability - An Overview; 7.3 Elements of Maintainability; 7.4 Availability; 7.5 Maintainability Process; 7.6 Maintainability Standards  
7.7 Relationship with Other Disciplines  
7.8 Summary; Review Questions; Exercises; References; Part B: Reliability and Maintenance Modeling; 8 Models and the Modeling Process; 8.1 Introduction; 8.2 Models; 8.3 Mathematical Modeling; 8.4 Approaches to Modeling; 8.5 Mathematical Modeling Process; 8.6 Statistics versus Probability Perspectives; 8.7 Modeling of Maintenance Decision Problems; 8.8 Summary; Review Questions; Exercises; Reference; 9 Collection and Analysis of Maintenance Data; 9.1 Introduction; 9.2 Data, Information, and Knowledge; 9.3 Maintenance Data; 9.4 Data Analysis  
9.5 Descriptive Statistics
