Sommario/riassunto	Textiles, textile production and clothing were essentials of living in prehistory, locked into the system of society at every level – social, economic and even religious. Textile crafts not only produced essential goods for everyday use, most notably clothing, but also utilitarian objects as well as representative and luxury items. Prehistoric clothing and their role in identity creation for the individual and for the group are also addressed by means of archaeological finds from Stone the Iron Age in Central Europe.
