| Titolo | Vertical alveolar ridge augmentation in implant dentistry : a surgical manual |
| Pubbl/distr/stampa | Ames Iowa, : John Wiley & Sons, Inc., 2016 |
| ISBN | 9781119082835 1-119-08275-7 |
| Descrizione fisica | 1 online resource (xiv, 354 pages) : illustrations |
| Disciplina | 617.6/93 |
| Soggetti | Dental Implantation Alveolar Ridge Augmentation Methods Bone Transplantation Prosthesis Implantation Investigative Techniques Orthopedic Procedures Oral Surgical Procedures, Preprosthetic Dentistry Prosthodontics Organ Transplantation Analytical, Diagnostic and Therapeutic Techniques and Equipment Oral Surgical Procedures Surgical Procedures, Operative Transplantation |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Nota di bibliografia | Includes bibliographical references and index. |
| Sommario/riassunto | Vertical Alveolar Ridge Augmentation in Implant Dentistry: A Surgical Manual presents the main methods of vertical ridge augmentation in a clinically focused surgical manual. After an introductory section on the alveolar ridge and requirements for dental implants, sections are devoted to each procedure: guided bone regeneration, sinus lift, |

distraction osteogenesis, block grafting, and free bone flaps. Also included is a section relating to intraoral soft tissue grafting to ensure acceptable esthetic outcomes, decision algorithm for bone augmentation, and tissue engineering of the alveolar complex. For each procedure, chapters describe the history of the procedure, diagnosis and treatment planning, the different techniques with corresponding case reports, and complications. Bibliography is provided in each chapter for additional learning.
