

1. Record Nr.	UNINA9910136531603321
Autore	Tilley R. J. D.
Titolo	Perovskites : structure-property relationships / / Richard Tilley
Pubbl/distr/stampa	Chichester, West Sussex, United Kingdom : , : Wiley, , 2016
ISBN	1-118-93563-2
Edizione	[First edition.]
Descrizione fisica	1 online resource (330 p.)
Disciplina	549/.528
Soggetti	Perovskite materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title Page; Copyright Page; Contents; Preface; Chapter 1 The ABX ₃ Perovskite Structure; 1.1 Perovskites; 1.2 The Cubic Perovskite Structure: SrTiO ₃ ; 1.3 The Goldschmidt Tolerance Factor; 1.4 ABX ₃ Perovskite Structure Variants; 1.5 Cation Displacement: BaTiO ₃ as an Example; 1.6 Jahn-Teller Octahedral Distortion: KCuF ₃ as an Example; 1.7 Octahedral Tilting; 1.7.1 Tilt Descriptions; 1.7.2 Trigonal Symmetry: LaAlO ₃ as an Example; 1.7.3 Orthorhombic Symmetry: GdFeO ₃ and CaTiO ₃ as Examples; 1.8 Symmetry Relationships; 1.9 Hybrid Organic-Inorganic Perovskites; 1.10 Antiperovskites 1.10.1 Cubic and Related Structures 1.10.2 Other Structures; 1.11 Structure-Field Maps; 1.12 Theoretical Calculations; References; Further Reading; Chapter 2 ABX ₃ -Related Structures; 2.1 Double Perovskites and Related Ordered Structures; 2.1.1 Rock-Salt Ordered Double Perovskites; 2.1.2 Other Ordered Perovskites; 2.1.3 AA ₂ BO ₆ ; 2.1.4 A ₂ BO ₄ -Related Phases; 2.2 Anion Substituted Perovskites; 2.2.1 Nitrides and Oxynitrides; 2.2.2 Oxyfluorides; 2.3 A-Site-Deficient Perovskite Structures; 2.3.1 ReO ₃ , WO ₃ and Related Structures; 2.3.2 Perovskite Tungsten Bronzes 2.3.3 A-Site-Deficient Titanates, Niobates and Tantalates 2.4 Anion-Deficient Phases Containing Tetrahedra; 2.4.1 Brownmillerites; 2.4.2 Brownmillerite Microstructures; 2.4.3 Temperature Variation and Disorder; 2.4.4 B-Site Doped Brownmillerite Phases; 2.4.5 B-Site Doping and Oxygen Pressure; 2.4.6 A-Site Doped Brownmillerite Phases; 2.4.7 Brownmillerite-Related Phases; 2.5 Anion-Deficient Phases Containing Square Pyramids; 2.5.1 Manganites; 2.5.2 SrFeO _{2.5}

and Related Phases; 2.5.3 Cobaltite-Related Phases; 2.6 Point Defects, Microdomains and Modulated Phases; Further Reading

Chapter 3 Hexagonal Perovskite-Related Structures 3.1 The BaNiO₃ Structure; 3.2 BaNiO₃-Related Phases Containing Trigonal Prisms; 3.2.1 Commensurate Structures; 3.2.2 Modulated Structures; 3.3 Perovskites with Mixed Hexagonal/Cubic Packing: Nomenclature; 3.4 Perovskites with Mixed Hexagonal/Cubic Packing: Stacking Sequences; 3.5 Hexagonal Perovskites with chq and cph Stacking; 3.5.1 (chq) Structures; 3.5.2 (cph) Structures; 3.5.3 cphq Intergrowth Structures; 3.6 Hexagonal Perovskites with cphh Stacking; 3.6.1 (cc2026;chh) AnBnO_{3n} Structures; 3.6.2 (cc2026;chh) AnBn₂₂₁₂;1O_{3n} Structures 3.6.3 (hhcc2026;chhcc2026;c) Intergrowth Phases 3.6.4 (cc2026;ch) AnBn₂₂₁₂;1O_{3n} Shift and Twinned Phases; 3.7 Anion-Deficient Phases Containing BaO₂ (c2032;) Layers; 3.7.1 (c2026;c2032;2026;ch) Structures; 3.7.2 (c2026;c2032;2026;chh) Structures; 3.7.3 (c2026;c2032;2026;chhh) Structures; 3.8 Anion-Deficient Phases with BaOX Layers; 3.8.1 (h2032;) Layers; 3.8.2 (c2032;c2032;) Layers; 3.9 Sr₄Mn₃O₁₀ and Ba₆Mn₅O₁₆; 3.10 Temperature and Pressure Variation; Reference; Further Reading; Chapter 4 Modular Structures; 4.1 K₂NiF₄ (A₂BX₄) and Ruddlesden-Popper Phases; 4.1.1 The K₂NiF₄ (T or T/O) Structure; 4.1.2 Ruddlesden-Popper Phases 4.2 The Nd₂CuO₄ (T₂₀₃₂;) and T* Structures
