Comparing Constitutional Politics in Central and Eastern Europe .
Sommario/riassunto	The contributions to this edited volume discuss constitutional politics in 20 Central and Eastern European countries. The country chapters describe all constitutional amendments and new constitutions after the first post-communist constitution-making, all failed amendment attempts, and the political discourses about constitutional politics. Framed by a broad comparative chapter, the country studies are embedded in the established literature on constitutional politics. The book thus provides a better understanding of constitutional politics in

the region and beyond.
