Sommario/riassunto	This book reviews the application of artificial intelligence and machine learning in healthcare. It discusses integrating the principles of computer science, life science, and statistics incorporated into statistical models using existing data, discovering patterns in data to extract the information, and predicting the changes and diseases based on this data and models. The initial chapters of the book cover the practical applications of artificial intelligence for disease prognosis & management. Further, the role of artificial intelligence and machine

learning is discussed with reference to specific diseases like diabetes mellitus, cancer, mycobacterium tuberculosis, and Covid-19. The chapters provide working examples on how different types of healthcare data can be used to develop models and predict diseases using machine learning and artificial intelligence. The book also touches upon precision medicine, personalized medicine, and transfer learning, with the real examples. Further, it also discusses the use of machine learning and artificial intelligence for visualization, prediction, detection, and diagnosis of Covid -19. This book is a valuable source of information for programmers, healthcare professionals, and researchers interested in understanding the applications of artificial intelligence and machine learning in healthcare.

Sommario/riassunto

South-central Wisconsin provides an impressive array of opportunities for all types of paddling, including some of the very best day trips in the entire state and even Upper Midwest. Paddling South Central Wisconsin, by experienced paddler and author Timothy Bauer, guides all types of paddlers, whether veteran or novice, through whitewater adrenaline or flatwater calm routes near Madison, Rockford, Janesville, Waukesha, and Milwaukee. This paddling guide is the perfect companion for those seeking "the rowed less taken." It describes the best times to paddle 60 diverse routes, alerts readers to each paddle's difficulty level and estimated length, and suggests side trips, optional trip extensions, and alternate routes to paddle, depending on weather conditions. Easy-to-follow maps, complete with GPS coordinates and driving directions, add to this book's high value. In addition, the author provides contact information on local paddling clubs, outfitters, and Internet links.

Sommario/riassunto

For adults with ADHD, problems with attention, planning, problem solving, and controlling emotions can make daily life an uphill battle. Fortunately, effective help is out there. No one is a better guide to how to get the best care-and what sufferers can do for themselves-than renowned ADHD researcher/clinician Russell A. Barkley. Dr. Barkley

provides step-by-step strategies for managing symptoms and reducing their harmful impact. Listeners get hands-on self-assessment tools and skills-building exercises, plus clear answers to frequently asked questions about medications and other treatments. Specific techniques are presented for overcoming challenges in critical areas where people with the disorder often struggle-work, finances, relationships, and more. Finally, an authoritative one-stop resource for adults with ADHD who are ready to take back their lives.
