| Sommario/riassunto      | This extraordinary seven-part book covers the processes of creating 13 projects -- from pencils to vases to bicycles -- for all personalities, skill levels and interests. It is specifically designed for students, beginning welders, hobbyists, and do-it-yourselfers. Many of the plans have been built multiple times by students and others. The plans are easy to read and the projects are meant to motivate the reader to want to learn the welding and fabrication processes. All plans include a list of materials, dimensions, special notes as needed., plus any commentaries about special equipment that might be necessary to compete the projects. |
