Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Much of the literary production on the Camorra focuses on the aspects of military control of the territory and on predatory activities in politics and economics. Less attention is paid to the social reproductive factors of organized crime groups. The aspects of mutuality and solidarity within the Camorra have never received a systematic and thorough observation. This research instead proposes the analysis of the elements of legitimacy and consensus of the Camorra groups in the territories in which they are established. Welfare and its double is a work that is articulated through a rich system that uses quantitative and ethnographic methodologies: an approach located at the meeting point between sociology and anthropology in the analysis of social policies, which uses unpublished and difficult judicial documents availability. A demanding field work in the Caserta area has made it

possible to decipher the forms of social assistance present: public and mafia ones. The result is the panorama of a criminal group that ensures incredible protection against affiliates and their families, which competes with the protections offered by public welfare. However, the results of this study show that it is precisely in the territories most conditioned by the Mafia presence that new forms of social struggle are born. It is here, in fact - where criminal infiltrations affect the procurement of welfare services - that the most innovative social actions in defense of the weakest categories were born.

Sommario/riassunto

Emile (1800-75) and Isaac Pereire (1806-80) were pivotal and sensational figures, their lives and careers a lens through which to re-examine the history of France in the nineteenth century. Among the first generation of Jews emancipated by the French Revolution, they became significant Saint-Simonians, contributing to its philosophy of financial and economic reform. They were the first to implement the new rail technology in France and to launch the first investment bank of any size in Europe, the Credit Mobilier. The Pereires ultimately came to stand behind banks and railways throughout Europe
