

1. Record Nr.	UNINA9910136827403321
Titolo	IEEE Std 1801-2015 (Revision of IEEE Std 1801-2013) : IEEE Standard for Design and Verification of Low-Power, Energy-Aware Electronic Systems / / Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	[Place of publication not identified] : , : IEEE, , 2016
ISBN	1-5044-0105-0
Descrizione fisica	1 online resource (1068 pages)
Disciplina	745.4
Soggetti	Design - Human factors Design
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	A method is provided for specifying power intent for an electronic design, for use in verification of the structure and behavior of the design in the context of a given power management architecture, and for driving implementation of that power-management architecture. The method supports incremental refinement of power-intent specifications required for IP-based design flows.
