Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	From nature to God -- Reading the ancients and reading Spinoza -- Reductio Ad Naturalismum -- The passion of Malebranche -- Creation and evil.
Sommario/riassunto	Atheism was the most fundamental challenge to early-modern French certainties. Leading educators, theologians and philosophers labelled such atheism as manifestly absurd, confident that neither the fact nor behaviour of nature was explicable without reference to God. The alternative was a categorical naturalism. This book demonstrates that the Christian learned world had always contained the naturalistic 'atheist' as an interlocutor and a polemical foil, and its early-modern

engagement and use of the hypothetical atheist were major parts of its intellectual life. In the considerations and polemics of an increasingly fractious orthodox culture, the early-modern French learned world gave real voice and eventually life to that atheistic presence. Without understanding the actual context and convergence of the inheritance, scholarship, fierce disputes, and polemical modes of orthodox culture, the early-modern generation and dissemination of absolute naturalism are inexplicable. This book brings to life that Christian learned culture, its dilemmas, and its unintended consequences.

 in the Academic Health Center: Progress and Opportunities;  
 INTRODUCTION; BEYOND DIVERSITY TO INCLUSION; THE VALUE OF  
 DIVERSITY  
 DEVELOPING A CONTEMPORARY CONCEPTUAL FRAMEWORK

## Sommario/riassunto

Presents the direct knowledge and vision of accomplished academic leaders whose unique positions as managers of some of the most complex academic and business enterprises make them expert contributors. Users will find invaluable insights and leadership perspectives on healthcare, health professions education, and biomedical and clinical research that systematically explores the evolving role of global academic health centers with an eye focused on the transformation necessary to be successful in challenging environments. The book is divided into five sections moving from the broad perspective of the role of academic health centers to the role of education, training, and disruptive technologies. It then addresses the discovery processes, improving funding models, and research efficiency. Subsequent sections address the coming changes in healthcare delivery and future perspectives, providing a complete picture of the needs of the growing and influential healthcare sector. --
