| 1. Record Nr.           | UNINA9910136925303321   |
| Titolo                  | 2015 Conference on Cosmetic Measurements and Testing (COMET) : Cergy-Pontoise, France, 8-9 June // Institute of Electrical and Electronics Engineers  |
| Pubbl/distr/stampa      | Pistacaway, New Jersey : , : IEEE, , [2015]<br>©2015  |
| ISBN                    | 1-4673-7127-0   |
| Descrizione fisica      | 1 online resource (15 pages) : illustrations  |
| Disciplina              | 668.55  |
| Soggetti                | Cosmetics   |
| Lingua di pubblicazione | Inglese   |
| Formato                 | Materiale a stampa  |
| Livello bibliografico   | Monografia  |
| Note generali           | Includes index.   |
| Nota di contenuto       | Ex vivo TSM online monitoring of the skin dehydration -- Digital image processing: clinical applications and challenges in cosmetics -- Morphology tools for color image processing, dermatology and cosmetology domain -- New wideband electromagnetic on-line system for microalgae production monitoring.  |
| Sommario/riassunto      | Annotation Many non invasive methods are now used to characterize the cosmetic products properties and their interactions with skin and hair Physico chemical studies, biological and clinical effects measurements, the development of new instrumental techniques are crucial for the cosmetic sector COMET (Cosmetic Measurement & Testing) is the 1st scientific congress dedicated to cosmetics testing & measurement COMET is the place where academic researchers, the major firms, SMEs and start ups share knowledge and participate in scientific discussion. |
