Livello bibliografico	Monografia
Note generali	Previous ed.: 2002.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Front matter -- Title page -- Copyright page -- Note -- Foreword to the 2nd Edition -- Acknowledgements -- Chronological table of statutes -- Table of cases -- Introduction -- The Nurse in Full Bloom -- Body matter -- Section 1 -- 1: What is law? -- 2: Professional issues -- 3: Values, morals and ethics -- Section 2 -- 4: Responsibility -- 5: Accountability -- 6: Negligence -- Section 3 -- 7: Principles of communication in different contexts -- 8: Written communication -- Back matter -- Appendix.
Sommario/riassunto	This title outlines the implications and application of the relevant recent legislation that relates to nursing practice. Professionally, this book looks at the demands and requirements of nursing, as it moves to an all graduate profession, and the subsequent legal and ethical implications.

Sommario/riassunto	Ce Cahier n’est ni un ouvrage sur l'industrie du sucre, ni une critique du modèle de développement de la Côte-d’Ivoire. Il ne s’agit pas davantage d’un essai sur la pratique des architectes. Notre propos, plus modeste, est de faire converger vers une problématique concrète des réflexions diverses allant des questions d’évaluation et de prise de décision jusqu’aux problèmes du marché du sucre, observés aussi sous l’angle historique, en passant par une analyse théorique du phénomène « urbanisation » et de propriété foncière. Ces réflexions diverses peuvent converger vers un même constat : lorsqu’ils s’interrogent sur la destination de leurs efforts ou sur le moteur des transformations auxquelles ils contribuent, les « experts » voient qu’ils ne contrôlent que très imparfaitement les transformations qu’ils sont censés prôner, promouvoir ou opérer...

	Sommario/riassunto	This book is an effort to foster the entrepreneurial spirit in young minds. It reviews a wide range of product ideas, opportunities and challenges associated with start-ups. In addition, it discusses popular molecular targets for biotechnology research / the biotech industry such as attenuated microbes, gene sequences, biomarkers, and the latest advance in the sector, CRISPR. These molecular targets can be modified for the production of sufficient quantities of food and fuel. Very often, researchers limit their focus to the proof of concept, and fail to successfully convert it into a finished product. To help young entrepreneurs avoid this pitfall, the book addresses various aspects like intellectual property regulations, commerce and management. The book’s contributing authors hail from various specialized sectors, and

from around the globe. Taken together, the respective chapters are intended to overcome the borders between disciplines that otherwise rarely interact. .

	Nota di contenuto	Functional and surgical anatomy of the nose vestibule -- Histology of nose vestibule malignancy -- Peculiar patterns of spread of nose vestibule malignancies -- Subsites in the nose, the WHO classification and the current 8th edition of AJCC/UICC TNM in the staging of nose vestibule malignancies -- Current misclassification of nose vestibule malignancies: need for the definition of nose vestibule as a subsite in the nose/paranasal cavities with a specific T classification -- Diagnostic work up of nose vestibule malignancies -- Current therapeutic options in nose vestibule malignancies -- Surgery in nose vestibule malignancies: the demolitive phase -- Surgery in nose vestibule malignancies: the reconstructive phase -- Surgery in nose vestibule malignancies: prostheses -- External beam radiotherapy for nose

	vestibule malignancies -- Brachytherapy for nose vestibule malignancies: oncological results -- Brachytherapy for nose vestibule malignancies: functional results -- Implantation technique in nose vestibule malignancies: learning from rhinoseptoplasty, beyond the Paris system -- Brachytherapy for nose vestibule malignancies: treatment planning beyond the Paris system -- Combined approaches and other treatment modalities -- Managing the neck in nose vestibule malignancies -- A new standard for the treatment of nose vestibule malignancies.
Sommario/riassunto	This book provides up-to-date information on nasal vestibule malignancies, outlining the specific clinical history and pattern of spread. It also describes the flaws in TNM staging, which can be attirbuted to factors ranging from the anatomy to the definition of the main prognostic parameters. Nasal vestibule malignancies are associated with a peculiar oncological history, but there are also clear issues related to the reconstructive phase following ablative surgery due to the anatomic peculiarities. Such issues deeply impact the cosmetic and functional results, and hence the quality of life of surviving patients. Additionally, the book describes novel evidence on treatment outcomes for these malignancies in terms of both oncological and functional results. It proposes a new standard based on interstitial HDR brachytherapy for the primary lesion and on surgery for regional metastases. The book appeals to a wide readership, ranging from otolaryngologists, to radiation and clinical oncologists, dermatologists, plastic surgeons and maxillo-facial surgeons.
