1. Record Nr. UNINA9910136984503321

Titolo	Ocular tissue engineering / / Dimitrios Karamichos (Ed.)
Pubbl/distr/stampa	[Basel, Switzerland] : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2016 ©2016
ISBN	9783038422020 9783038422013
Descrizione fisica	1 online resource (xiii, 292 pages) : illustrations; digital file(s)
Disciplina	617.752
Soggetti	Ophthalmology - Tissue engineering Ophthalmology - Technological innovations Therapeutics, Ophthalmological Tissue engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"This book is a reprint of the special issue that appeared in the online open access journal Journal of Functional Biomatrials (ISSN 2079-4983) in 2015-2016" -- title page verso.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. An editorial --Chapter 2. Ocular disease and future biomaterials --3. Ocular nanotechnology and tissue engineering
Sommario/riassunto	Tissue engineering emerged back in the 1990s as a new concept to overcome the problem of tissue and organ failure. Over recent decades, there has been incredible progress towards the regeneration of tissues such as bone, heart valves, cartilage, cornea, and retina. In terms of ocular tissue engineering, despite the scientific and strategic incentive for reconstructing ocular tissues, there is also a tremendous need for novel therapeutic options in treating numerous eye diseases related to tissue failure. The aim of this Special Issue is to discuss tissue engineering applications of ocular tissues including but not limited to cornea, retina, and lenses.
