Sommario/riassunto	This comparative investigation is focused on the comparison of contents, themes, topics, motives, but also symbolism, stereotype situations, patterns of behavior etc. of sung and narrated oral text in South-east Europe. Great importance was given to bibliography, usually difficult to compile in a time-consuming process; a separate part at the end of the volume is dedicated to a bibliographie résonée, arranged according to countries and genres; this will facilitate further and more specific research in special fields of interest. This book offers for the first time a comparative survey of nearly all genres of the traditional oral folklore of Southeast Europe, independent from language, ethnic grouping, national borders, religion and confessions.
