Sommario/riassunto	The city of Göttingen is home to many important medieval churches. The panorama of the building histories, the uses and the variety of forms extends from the 13th to the 16th century and even up to the present day, since the churches have always been changed again and again. The church buildings are the most visible evidence of an era long past. The book reveals this treasure and takes the reader on a journey through time, in which the six preserved churches are examined in detail in a way never seen before.
