Sommario/riassunto	Written by an internationally renowned authority in the field,this is the most complete dictionary devoted specifically to theterms currently

used in pharmacoepidemiology. The use of clear and consistent terminology in science has never been more important, and this dictionary, which has been translated from the third edition of a French original, has been reworked to include suggestions made by pharmacoepidemiologists currently using existing versions. It contains revised definitions for nearly all established terms in addition to comprehensive descriptions of new terms and is well illustrated with practical examples. This outstandingly high-quality dictionary will be essential for all those whose work is within or touches upon this field: regulatory authorities, pharmaceutical physicians, lawyers, pharmacists, researchers, evaluators and students.

Sommario/riassunto	The biography of the educated citizen, German national conservative, scientist and officer Dr. phil. habil. Hans Jüngst (1901-1944) pretty much covers the period of the "German Age of Extreme" (Hans-Ulrich Wehler). It is based on an impressive collection of sources from the

legacy of Hans Jüngst in terms of mentality: private, war and field post letters, diaries, notes and documents from the entire first half of the 20th century. Through this inheritance, the end of the German Empire, the decline of the Weimar Republic, the reign of National Socialism and the Second World War could be understood from an everyday historical perspective in the present biographical study. Attached is a selection edition of field post letters from the correspondence between Hans Jüngst and his wife from 1940-1944.
