Autore	Lanzkowsky Philip <1932->
Titolo	Manual of pediatric hematology and oncology [[electronic resource] /] / Philip Lanzkowsky
Pubbl/distr/stampa	Amsterdam, : Elsevier/Academic Press, 2011
ISBN	1-282-87896-4 9786612878961 0-12-375155-1
Edizione	[5th ed.]
Descrizione fisica	1 online resource (1058 p.)
Disciplina	618.9215
Soggetti	Pediatric hematology Tumors in children Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Manual of Pediatric Hematology and Oncology; Copyright Page; Contents; Dedication; Contributors; Introduction; Preface to the Fifth Edition; Preface to the Fourth Edition; Preface to the Third Edition; Preface to the Second Edition; Preface to the First Edition; Chapter 1. Classification and Diagnosis of Anemia in Children; Chapter 2. Anemia During the Neonatal Period; Hemolytic Anemia; Failure of Red Cell Production; Anemia of Prematurity; Diagnostic Approach to Anemia in the Newborn; Chapter 3. Iron-Deficiency Anemia; Non-Hematological Manifestations; Staging; Treatment Lymphoblastic Lymphoma Chapter 4. Megaloblastic Anemia; Special Treatment Considerations; Chapter 5. Hematologic Manifestations of Systemic Illness; Lead Intoxication; Nutritional Disorders; Bone Marrow Infiltration; Chapter 6. Bone Marrow Failure; Aplastic Anemia; Nephroblastomatosis; Congenital Dyserythropoietic Anemia (CDA); Sideroblastic Anemias (Mitochondrial Diseases with Bone Marrow Failure Syndromes); Chapter 7. Red Cell Membrane and Enzyme Defects; Neuroblastoma in the Neonate; Suggested Reading; Chapter 8. Hemoglobinopathies; Hemostasis in the Newborn; Unstable Hemoglobins

-Thalassemias Suggested Reading; Chapter 9. Extracorporeal Hemolytic Anemia; Chapter 10. Polycythemia; Primary Familial and Congenital Polycythemia; Suggested Reading; Chapter 11. Disorders of White Blood Cells; Decreased Polymorphonuclear Leukocyte Production; Clinical Features; Treatment; Increased Destruction or Disorders of Distribution of Polymorphonuclear Leukocytes; Neutrophil Production and Destruction in Newborn Infants; Suggested Reading; Chapter 12. Disorders of Platelets; Qualitative Platelet Disorders; Inherited Vascular and Connective Tissue Disorders
Laboratory Evaluation of Platelets and Platelet Function
Nonthrombocytopenic Purpura; Suggested Reading; Chapter 13. Hemostatic Disorders; Detection of Hemostatic Defects; Acquired Coagulation Factor Disorders; Chapter 14. Thrombotic Disorders; Thrombotic Disorders in Newborns; Sickle Cell Disease; Venous Thrombosis; Chapter 15. Lymphadenopathy and Splenomegaly; Lymphadenopathy; Suggested Reading; Suggested Reading; Chapter 16. Lymphoproliferative Disorders, Myelodysplastic Syndromes and Myeloproliferative Disorders; Suggested Reading; Chapter 17. Leukemias; Suggested Reading
Chapter 18. Histiocytosis Syndromes
Chapter 19. Hodgkin Lymphoma; Follow-up Evaluations; Suggested Reading; Chapter 20. Non-Hodgkin Lymphoma; Polycythemia in Childhood; Pathologic Classification; Diagnosis; Staging; Renal Cell Carcinoma (RCC); Chapter 21. Central Nervous System Malignancies; Diagnostic Evaluation; Survivorship; Astrocytomas; Brain Stem Tumors; Etiology; Chapter 22. Neuroblastoma; Pathology and Biology; Biology; Suggested Reading; Neuroblastoma in the Adolescent and Young Adult; Suggested Reading; Suggested Reading; Chapter 23. Renal Tumors; Diagnostic Evaluation
Suggested Reading

Sommario/riassunto

Given that there have been considerable advances in the treatment and management of oncologic diseases in children, the fifth edition of this successful clinical manual will be entirely updated to incorporate all current protocols and developments. This edition will be a comprehensive book on patient management, replete with algorithms and flow diagrams on diagnosis and management. Its concise and easy-to-read format will enable readers to make accurate diagnoses and permit them to treat patients without having extensive previous hematologic/oncologic experience. A list of normal values at v

Nota di contenuto	The consumption of animal products and the human right to health care --The ethics of qualified moral veganism --The politics of qualified moral veganism --An evaluation of others' deliberations -- Might a vegan diet be healthy, or even healthier?
Sommario/riassunto	In this book, Jan Deckers addresses the most crucial question that people must deliberate in relation to how we should treat other animals: whether we should eat animal products. Many people object to the consumption of animal products from the conviction that it inflicts pain, suffering, and death upon animals. This book argues that a convincing ethical theory cannot be based on these important concerns: rather, it must focus on our interest in human health. Tending to this interest demands not only that we extend speciesism-- the attribution of special significance to members of our own species merely because they belong to the same species as ourself--towards nonhuman animals, but also that we safeguard the integrity of nature. In this light, projects that aim to engineer the genetic material of animals to reduce their capacities to feel pain and to suffer are morally

suspect. The same applies to projects that aim to develop in-vitro flesh, even if the production of such flesh should be welcomed on other grounds. The theory proposed in this book is accompanied by a political goal, the 'vegan project', which strives for a qualified ban on the consumption of animal products. Deckers also provides empirical evidence that some support for this goal exists already, and his analysis of the views of others--including those of slaughterhouse workers--reveals that the vegan project stands firm in spite of public opposition. Many charges have been pressed against vegan diets, including: that they alienate human beings from nature; that they increase human food security concerns; and that they are unsustainable. Deckers argues that these charges are legitimate in some cases, but that, in many situations, vegan diets are actually superior. For those who remain doubtful, the book also contains an appendix that considers whether vegan diets might actually be nutritionally adequate.
