

1. Record Nr.	UNINA9910137120203321
Autore	Brown Charles H.
Titolo	Geriatric anesthesia // Charles H. Brown, IV. MD, MHS, Division of Cardiac Anesthesia, Department of Anesthesiology and Critical Care Medicine, Johns Hopkins School of Medicine, Baltimore, MD, USA, Mark D. Neuman, MD, MSc, Department of Anesthesiology and Critical Care, Perelman School of Medicine at the University of Pennsylvania, Philadelphia, PA, USA
Pubbl/distr/stampa	Philadelphia : , : Elsevier, , 2015
ISBN	0-323-39552-X
Descrizione fisica	1 online resource (235 p.)
Collana	Anesthesiology clinics, , 1932-2275 ; ; volume 33, number 3 The clinics. Internal medicine
Disciplina	617.96
Soggetti	Geriatric anesthesia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index. "Clinics review articles"--cover.
Nota di contenuto	Cover image; Title page; Table of Contents; Copyright Page; Contributors; Consulting Editor; Editors; Authors; Forthcoming Issues; Forthcoming Issues; Recent Issues; Foreword: Geriatric Anesthesia: Can We Achieve the Goal of Returning our Elderly to Baseline or Improved Function?; Preface: Optimizing Perioperative Care for Older Adults; The History of Geriatric Anesthesia in the United States and the Society for the Advancement of Geriatric Anesthesia; Key points; Introduction; The early years; American Society of Anesthesiologists Committee on Geriatric Anesthesia Society for the Advancement of Geriatric AnesthesiaInvolvement by the American Geriatrics Society; American Society of Anesthesiologists involvement; Future considerations; Geriatrics and the Perioperative Surgical Home; Key points; Introduction; Definition of the perioperative surgical home; Triple aim; Where to start?; Benefits of the perioperative surgical home; Aging patient population; Role in geriatrics; Complications in the geriatric population: room for improvement?; Future considerations/summary; Physiology Considerations in Geriatric Patients; Key points; Introduction

Nervous system; Cardiovascular system; Respiratory system; Gastrointestinal system; Renal and volume regulation system; Endocrine system; Summary; Geriatric Pharmacology; Key points; Introduction; Cerebral mechanisms of general anesthesia; Pharmacokinetic changes with aging; Pharmacologic considerations of specific anesthetic medications; Applying pharmacologic knowledge to practice; Consequences of overdosing anesthetics in elderly patients; Summary; Preoperative Assessment of Geriatric Patients; Key points; Introduction; Neuropsychiatric evaluation; Cardiac evaluation; Pulmonary evaluation

Frailty; Functional status; Nutritional status; Medication history and polypharmacy; Diagnostic tests; Patient counseling; Future considerations/summary; Optimal Preoperative Evaluation and Perioperative Care of the Geriatric Patient; Key points; Introduction; The American College of Surgeons/American Geriatrics Society best practice guidelines; The complete meal: best practices and more; The a la carte menu: more practical options for some; Summary; Anesthetic Considerations for Common Procedures in Geriatric Patients; Key points; Introduction

General approach to anesthetic management in the elderly patient; Anesthetic considerations for hip fractures; Anesthetic considerations for emergent general surgery; Anesthetic considerations for transcatheter aortic valve replacement; Future directions; Postoperative Delirium in the Geriatric Patient; Key points; Introduction; Risk factors; Diagnosis; Pathophysiology; Management; Current controversies and future considerations; Summary; Postoperative Cognitive Dysfunction; Key points; A description of postoperative cognitive dysfunction and postoperative cognitive improvement

Who is at risk for developing postoperative cognitive dysfunction?

---

#### Sommario/riassunto

The volume of elderly patients requiring anesthesia and surgery is growing rapidly. Thirty-five percent of surgeries are performed on patients older than 65 years, and in general, these patients have higher morbidity and mortality rates after anesthesia compared with their younger counterparts. One of the major challenges of treating elderly patients is the heterogeneity of the geriatric population-and the need to individualize care for each patient to provide the best outcome.

2. Record Nr.	UNINA9910784112303321
Titolo	Globalization from below [[electronic resource] ] : transnational activists and protest networks / / Donatella della Porta ... [et. al.]
Pubbl/distr/stampa	Minneapolis, Minn., : University of Minnesota Press Bristol, : University Presses Marketing [distributor], 2006
ISBN	0-8166-9763-9
Descrizione fisica	1 online resource (317 p.)
Collana	Social movements, protest, and contention ; ; v. 26
Altri autori (Persone)	Della PortaDonatella <1956->
Disciplina	303.484
Soggetti	Anti-globalization movement Globalization
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Globalization and social movements -- The development of a global movement: network strategies, democracy, participation -- Master frame, activists' ideas, and collective identity -- Global-net for global movements? a network of networks for a movement of movements -- Media-conscious and nonviolent? protest repertoires -- Transnational protest and public order -- Politics, antipolitics, and other politics: democracy and the movement for globalization from below -- The global movement and democracy.
Sommario/riassunto	Presenting the first systematic empirical research on the global justice movement, Globalization from Below analyzes a movement from the viewpoints of the activists, organizers, and demonstrators themselves. The authors traveled to Genoa with anti-G8 protesters and collected data from more than 800 participants. They examine the interactions between challengers and elites, and discuss how new models of activism fit into current social movement work.
