

1. Record Nr.	UNINA9910137120603321
Autore	Honiden Shyoko
Titolo	Advances and Challenges in Critical Care, An Issue of Clinics in Chest Medicine
Pubbl/distr/stampa	Philadelphia, : Elsevier Health Sciences, 2015
ISBN	0-323-39558-9
Descrizione fisica	1 online resource (314 p.)
Collana	The Clinics: Internal Medicine ; ; v.36-3
Disciplina	617.54028
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover image; Title page; Table of Contents; Copyright; Contributors; Editors; Authors; CME Accreditation Page; Target Audience; Learning Objectives; Accreditation; Disclosure of Conflicts of Interest; Unapproved/Off-Label Use Disclosure; To Enroll; Method of Participation; CME Inquiries/Special Needs; Forthcoming Issues; Forthcoming Issues; Recent Issues; Preface: Advances and Challenges in Critical Care Medicine; New Technologies and Interventions; Novel Uses of Extracorporeal Membrane Oxygenation in Adults; Key points; Introduction; Configurations of extracorporeal membrane oxygenation Emerging indications for extracorporeal membrane oxygenation in respiratory failure Emerging indications for extracorporeal membrane oxygenation in cardiac failure; Interhospital transport on extracorporeal membrane oxygenation; Early mobilization on extracorporeal membrane oxygenation; Extracorporeal membrane oxygenation as destination therapy; Complications; Economic impact of extracorporeal membrane oxygenation; Ethical implications of extracorporeal membrane oxygenation; Summary; Novel Uses of Targeted Temperature Management; Key points; Introduction Question 1: Which intensive care unit patients with neurologic injury should I cool? Question 2: Which intensive care unit patients with nonneurologic injury should I cool?; Question 3: How should I cool critically ill patients?; Question 4: What are the practical considerations for targeted temperature management use?; Question 5: Is targeted temperature management safe? How should I monitor targeted

temperature management patients?; Summary; ICU Telemedicine Solutions; Key points; Intensive care unit telemedicine solutions; Patient safety

Increased access to expertise: a leveraged workforce solution  
Improving effectiveness: population management, standardization, and reporting;  
Intensive care unit telemedicine staffing; Intermittent intensive care unit telemedicine; Financial considerations; Summary; Supportive Care; Controversies and Misconceptions in Intensive Care Unit Nutrition; Key points; Introduction; Answers to common misconceptions in intensive care unit nutrition; Other controversies in intensive care unit nutrition; Summary; Sleep Loss and Circadian Rhythm Disruption in the Intensive Care Unit; Key points

Introduction  
Consequences of intensive care unit sleep disruption;  
Sources of intensive care unit sleep disruption; Management goals; Pharmacologic strategies; Nonpharmacologic strategies; Self-management strategies; Summary/Discussion; Barriers and Challenges to the Successful Implementation of an Intensive Care Unit Mobility Program; Key points; Introduction; The challenge of early intensive care unit mobilization as a change initiative; Start by letting go of the idea of changing culture; Planning for change at a leadership level  
Understanding the psychology of change and motivation at an individual level
