

1. Record Nr.	UNINA9910137405603321
Titolo	2015 IEEE 12th International Conference on Wearable and Implantable Body Sensor Networks (BSN) : MIT Media Lab, 75 Amherst Street, Cambridge, MA 02139, June 9-12, 2015 // Institute of Electrical and Electronics Engineers
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE, , 2015
ISBN	1-4673-7201-3
Descrizione fisica	1 online resource (457 pages) : illustrations
Disciplina	610.28
Soggetti	Biosensors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The availability of small, low cost networked sensors combined with advanced signal processing and information extraction is driving a revolution in physiological monitoring and intervention Body Sensor Networks (BSN) are enabling technologies for precision healthcare, enhanced sports and fitness training, novel life style monitoring, and individualized security The 12th International Conference on Wearable and Implantable Body Sensor Networks (BSN 2015) will address BSN research and offer participants a unique forum to discuss the key issues and innovative solutions for sensors, communications, algorithms, systems, and applications The conference features numerous invited lectures by leading academic researchers and industrial experts On the days before and after the conference, tutorials will be presented, detailing and demonstrating BSN technologies from sensor networks to the algorithms that employ them.
