Sommario/riassunto	In Japan, "'hibakusha"' means "'the people affected by the explosion"' --specifically, the explosion of the atomic bomb in Hiroshima in 1941. In this classic study, winner of the 1969 National Book Award in Science, Lifton studies the psychological effects of the bomb on 90,000 survivors. He sees this analysis as providing a last chance to understand--and be motivated to avoid--nuclear war. This compassionate treatment is a significant contribution to the atomic age.

Sommario/riassunto	This major reference work breaks new ground as an electronic resource for students, educators, researchers, and professionals. Encyclopedic in breath, textbook in depth, Child Behavior and Development serves as a reference repository of knowledge in the field as well as a frequently updated conduit of new knowledge long before such information trickles down from research to standard textbooks. Presented in A to Z format, the Encyclopedia of Child Behavior and Development consists of three volumes that address the major conceptual areas of child development: learning, behavior, and emotions. Taking advantage of the techniques offered by the electronic medium, the Encyclopedia of Child Behavior and Development offers an extensive cross-referencing

system that facilitates speedy search and retrieval of information.
