

1. Record Nr.	UNINA9910137427703321
Titolo	The Wiley-Blackwell handbook of judgment and decision making // edited by Gideon Keren and George Wu ; contributors, Sooyun Baik [and sixty-seven others]
Pubbl/distr/stampa	West Sussex, England : , : Wiley Blackwell, , 2015 ©2015
ISBN	1-118-91279-9 1-118-91615-8 1-118-91275-6
Descrizione fisica	1 online resource (1063 p.)
Collana	THEi Wiley ebooks
Classificazione	PSY008000
Disciplina	153.4/6
Soggetti	Decision making Judgment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	"This two-volume reference is a comprehensive, up-to-date examination of the most important theory, concepts, methodological approaches, and applications in the burgeoning field of judgment and decision making (JDM). Brings together a multi-disciplinary group of contributors from across the social sciences, including psychology, economics, marketing, finance, public policy, sociology, and philosophy Provides accessible, essential information, complete with the latest research and references, for experts and non-experts alike in two volumes Emphasizes the growth of JDM applications with separate chapters devoted to medical decision making, decision making and the law, consumer behavior, and more Addresses controversial topics (such as choice from description vs. choice from experience and contrasts between empirical methodologies employed in behavioral economics and psychology) from multiple perspectives "-- Provided by publisher. "A comprehensive, up-to-date examination of the most important

theory, concepts, methodological approaches, and applications in the burgeoning field of judgment and decision making"-- Provided by publisher.

Nota di contenuto	Introduction -- Universal health coverage and occupational health and safety issues for the informal workforce -- Mapping solutions to universal health coverage inclusive of the informal workforce -- Responding to work-related health needs of informal sector workers -- Select country experience -- Closing remarks -- References -- Appendix A: workshop agenda -- Appendix B: speaker biographical sketches.
Sommario/riassunto	"Universal health coverage (UHC) has been recognized by the World Health Organization as a key element in reducing social inequality and a critical component of sustainable development and poverty reduction. In most of the world UHC is sought through a combination of public

and private-sector health care systems. In most low- and middle-income countries health systems are evolving to increasingly rely on the private sector because the public sector lacks the infrastructure and staff to meet all health care needs. With growing individual assets available for private-sector expenditure, patients often seek better access to technology, staff, and medicines. However, in low-income countries nearly 50 percent of health care financing is out-of-pocket. With the expected increase in the overall fraction of care provided through the private sector, these expenditures can be financially catastrophic for individuals in the informal workforce. In the global workforce of approximately 3 billion people, only 10 to 15 percent are estimated to have some type of access to occupational health services. The informal workforce is growing worldwide, and the degree to which its occupational health needs are satisfied depends on the capabilities of the general health care system. In July 2014, the Institute of Medicine held a workshop on approaches to universal health coverage and occupational health and safety for informal sector workers in developing countries. This report summarizes the presentations and discussions from this workshop. Approaches to Universal Health Coverage and Occupational Health and Safety for the Informal Workforce in Developing Countries identifies best practices and lessons learned for the informal workforce in developing countries in the financing of health care with respect to health care delivery models that are especially suitable to meeting a population's needs for a variety of occupational health issues, including the prevention of or mitigation of hazardous risks and the costs of providing medical and rehabilitation services and other benefits to various types of workers within this population. These experiences and lessons learned may be useful for stakeholders in moving the discussions, policies, and mechanisms forward to increase equitable access to quality health services without financial hardship for the informal workforce"--
