

1. Record Nr.	UNINA9910137461203321
Autore	Romanowicz Barbara A.
Titolo	Physique de l'intérieur de la terre // Barbara Romanowicz
Pubbl/distr/stampa	Collège de France, 2012 Paris : , : College de France, Fayard, , 2012
ISBN	2-8218-1483-6 2-7226-0165-6
Descrizione fisica	1 online resource (70 pages) : illustrations; digital, PDF file(s)
Collana	Leçons inaugurales du collège de France ; ; 221
Disciplina	550
Soggetti	Geophysics Seismology Geology Earth & Environmental Sciences Dynamic & Structural Geology Earth (Planet) Internal structure
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Earthquakes, tsunamis, volcanic eruptions: the extent of certain recent natural disasters and their dramatic consequences have reminded us of the power of terrestrial phenomena and of the need for scientific research to understand the Earth's dynamics more fully. Over the last twenty years the study of the Earth's interior has witnessed a real revolution, owing in particular to the development of increasingly sophisticated seismic tomography techniques and the powerful computations made possible by progress in numerical methods and computer technology. Barbara Romanowicz presents us with the current progress and challenges of global seismology.
