Sommario/riassunto	This study analyses, in a sociolinguistic approach, the speeches on the language of the Jura autonomist movement during the twenty hottest years of the struggle for the creation of the 23rd Swiss canton. It explores the hypothesis that the language ideologies present in this discourse participated in the construction of the identity of the separatist Jurassians as a French-speaking linguistic minority endangered under the tutelage of the canton of Bern with a German-speaking majority. A varied corpus has been analysed, consisting mainly of the autonomist weekly <i>Le Jura Libre</i> , of the publications of the Rassemblement jurassien (RJ) and of its members and of archival documents. The Jura case shows once again that language ideologies are not so much about language as about society, classifying French speakers and bilinguals, creating an impermeable symbolic border between Bernese and Jurassians. Sharing these ideologies with other

minorities, the RJ amplifies very traditional received ideas on bilingualism, the excellence of French, Germanization or linguistic determinism that it reinterprets and directs in a direction allowing it to make French a symbolic weapon. This linguistic position is pushed to its climax until it becomes a real posture of political combat in the context of the Jura Question. Sommario/riassunto	There is no mistaking that inequality in the workplace is still prevalent

in the form of salary inequity and unequal representation in leadership and board positions. Too often conversations about inequality can lead to men and women believing they are alike. Women and men are not the same, biologically or psychologically, and these differences lead to significant dissimilarities in how each approaches leadership situations. Grace Meets Grit navigates the previously unexplored subject of gender differences in the workplace specifically applied to critical leadership behaviors. Leadership behaviors are what make us all successful in the workplace. They are how we are evaluated against our peers and what we use to solve problems when working in teams. We also know that the most effective organizations work diligently to optimize these leadership behaviors. Through stories of extraordinary, courageous women, Grace Meets Grit shows how to compensate for your innate style by "dialing up" leadership qualities you may not naturally possess. Middleton empowers women, in particular, to embrace their innate qualities and anticipate and apply behaviors expected of their male counterparts to help level the playing field. The end result is fewer misunderstandings in the workplace and higher performance from both individual leaders and teams.
