

1. Record Nr.	UNINA9910137577103321
Titolo	Cardiorenal medicine
Pubbl/distr/stampa	Basel, : Karger Basel : , : Karger, , 2011
ISSN	1664-5502
Descrizione fisica	1 online resource
Disciplina	616.12005
Soggetti	Heart Diseases Nephrology Cardiology Kidneys - Diseases - Treatment Cardiovascular system - Diseases - Treatment Periodical
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Refereed/Peer-reviewed
Nota di contenuto	The Heart and the Kidneys: Partners in Disease? -- The Cardiorenal Syndrome: Basis and Common Ground for a Multidisciplinary Patient-Oriented Therapy -- The Role of Overweight and Obesity in the Cardiorenal Syndrome -- Cardiorenal Syndrome: The Clinical Cardiologists' Perspective -- Overnutrition and the Cardiorenal Syndrome: Use of a Rodent Model to Examine Mechanisms -- Effects of Chronic Antagonism of Endocannabinoid-1 Receptors on Glucose Tolerance and Insulin Action in Skeletal Muscles of Lean and Obese Zucker Rats -- Diabetic Cardiovascular Disease Predicts Chronic Kidney Disease Awareness in the Kidney Early Evaluation Program -- Central Pressure and Biomarker Responses to Renin Inhibition with Hydrochlorothiazide and Ramipril in Obese Hypertensives: The ATTAIN Study -- Hypoglycemia: A Possible Link between Insulin Resistance, Metabolic Dyslipidemia, and Heart and Kidney Disease (the Cardiorenal Syndrome).
Sommario/riassunto	The journal of 'CardioRenal Medicine' explores the mechanisms by which obesity and other metabolic abnormalities promote the pathogenesis and progression of heart and kidney disease (cardiorenal

metabolic syndrome).
