Livello bibliografico	Monografia
Sommario/riassunto	TNM Online is an indispensable tool for all oncologists and other professionals who employ the TNM classification system in assessing the diagnosis, treatment, and prognosis of patients with cancer. This reference includes the following renowned International Union Against Cancer (UICC) references in an intuitive fully searchable online format : TNM Classification of Malignant Tumours; Prognostic Factors in Cancer; TNM Supplement : A Commentary on Uniform Use. (T refers to the size of the primary tumor ; N will describe the extent of lymph node involvement; M refers to the presence or absence of metastases).
