Soggetti	Prime ministers - China Electronic books. China History Ming dynasty, 1368-1644
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	A star ascending -- As grand secretary -- The coast -- Chief grand secretary -- Bowing out.
Sommario/riassunto	This fascinating history uncovers the hidden political world of Ming China, exploring how the most powerful man in mid-sixteenth-century China steered the empire through the worst crises it had ever faced. Distinguished scholar John W. Dardess traces how Chief Grand Secretary Xu Jie rose to power and successfully shepherded the Ming empire through the destructive mid-sixteenth-century raids along its continental and maritime frontiers. He also shows how Xu Jie used the new Confucian thinking of the Wang Yangming school to build a political following, suppress bureaucratic corruptio

Recommendations for the Design and Implementation of the Special Area Designation Process -- B. Conclusions -- Notes -- Alphabetical List of Major References.

Federal programs applicable to the oceans and coastal zone have evolved incrementally in response to perceived needs to expedite emerging marine development while conserving valuable marine resources. As a result, the current federal marine effort is divided among a plethora of programs administered by a number of agencies within different Departments. The programs themselves are conducted under the authority of multiple statutes with varying reaches and objectives: as a result they often overlap and conflict. There is no assurance, moreover, that the coverage of federal programs is complete in scope or comprehensive in conception. No single institutional device can ensure that these programs will manage the marine resources of the United States consistently and comprehensively, so as to derive maximum public benefit. While the present maze of statutes, regulations, and executive directives may in theory provide opportunities for a wide-ranging consideration of all relevant factors prior to making specific decisions, there can be no guarantee that this objective is realized either systematically or reasonably effectively. Recent political developments indicate that the structure of federal marine programs will continue to be subject to scrutiny for some time. President Reagan's emphases on economic deregulation and development of outer continental shelf (OCS) oil and gas resources may lead to streamlining the OCS leasing and permitting process and altering the execution of the federal multiple use policy for marine areas.
