   Descrizione fisica 1 online resource (178 pages)

   Soggetti   COMPUTERS / Artificial Intelligence / General

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto In the last decade, further applications of speech processing were
                       developed, such as speaker recognition, human-machine interaction,
                       non-English speech recognition, and non-native English speech
                       recognition. This book addresses a few of these applications.
                       Furthermore, major challenges that were typically ignored in previous
                       speech recognition research, such as noise and reverberation, appear
                       repeatedly in recent papers. I would like to sincerely thank the
                       contributing authors, for their effort to bring their insights and
                       perspectives on current open questions in speech recognition research.
