Sommario/riassunto	Soft Computing stands for system solutions based on soft computing techniques. Soft Computing is aimed to provide rapid publication of important and timely results on soft computing technologies, intended as a fusion of the following research areas: Evolutionary algorithms and genetic programming, Neural science and neural net systems, Fuzzy set

theory and fuzzy systems and, Chaos theory and chaotic systems. Soft Computing will be seen from various perspectives: mathematical, system, hard and soft ware. The journal will encourage the integration of soft computing.
