1. Record Nr. UNINA9910138981003321

Autore	Frikha Mounir
Titolo	Ad hoc networks [[e-book]] : routing, QoS and optimization / / Mounir Frikha
Pubbl/distr/stampa	London ; ; Hoboken, New Jersey : , : ISTE : , : Wiley, , 2011
ISBN	1-118-55774-3 1-118-60098-3 1-118-60097-5 1-299-18755-2
Edizione	[1st edition]
Descrizione fisica	1 online resource (278 p.)
Collana	ISTE
Disciplina	004.6 004.6/8 004.68
Soggetti	Ad hoc networks (Computer networks)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Adapted and updated from Reseaux ad hoc : routage, qualite de service et optimisation published 2010 in France by Hermes Science/Lavoisier c2010.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Ad Hoc Networks; Title Page; Copyright Page; Table of Contents; Chapter 1. Introduction to Ad Hoc Networks; 1.1. Introduction; 1.2. Wireless networks and communications; 1.2.1. Wireless communications; 1.2.2. Wireless networks; 1.2.3. Classification of wireless networks; 1.2.3.1. Classification by type of network architecture; 1.2.3.2. Classification by extent of the zone covered; 1.2.3.3. Classification by means of access to the radio channel; 1.3. Ad hoc networks (MANET); 1.3.1. Characteristics and advantages; 1.3.2. Applications; 1.4. Routing of ad hoc networks 1.4.1. Hierarchical routing, flat routing and routing by geographic localization1.4.2. Link-state, distance-vector and source-routing protocols; 1.4.3. Proactive, reactive and hybrid routing; 1.5. Conclusion; Chapter 2. Routing in MANETs; 2.1. Introduction; 2.2. Internet routing protocols; 2.2.1. Distance-vector routing protocols; 2.2.2. Link-state routing protocols; 2.2.3. Unsuitability of Internet routing protocols for MANETs; 2.3. Classification of routing protocols

in MANET; 2.3.1. Table-driven routing protocols; 2.3.1.1. Destination-sequenced distance-vector routing (DSDV)
2.3.1.2. Optimized link-state routing protocol2.3.2. Reactive (on demand) routing protocols; 2.3.2.1. Dynamic source-routing (DSR); 2.3.2.2. Ad hoc on-demand distance-vector; 2.3.3. Hybrid routing protocols; 2.3.4. Hierarchical routing protocols; 2.3.5. Geographic routing protocols; 2.3.6. Routing protocols with power control; 2.3.7. Multicast routing protocols; 2.4. Conclusion; Chapter 3. Performance Evaluation of OLSR and AODV Protocols; 3.1. Introduction; 3.2. The AODV protocol; 3.2.1. Route establishment; 3.2.1.1. Path discovery; 3.2.1.2. Reverse path setup; 3.2.1.3. Forward path setup
3.2.1.4. Routing table management3.2.2. Path maintenance; 3.3. The OLSR protocol; 3.3.1. Format of OLSR packets and node addresses; 3.3.2. Operation of the protocol; 3.3.2.1. Neighborhood sensing; 3.3.2.2. Topology management; 3.3.2.3. Routing; 3.4. Simulation environment; 3.4.1. The ns-2 network simulator; 3.4.2. Methodology; 3.4.3. Parameters to evaluate; 3.4.3.1. Average packet delay; 3.4.3.2. Packet delivery success rate; 3.4.3.3. Traffic overhead (TOH); 3.4.3.4. Route acquisition latency (RAL); 3.5. Results and analysis; 3.5.1. Packet delivery ratio; 3.5.2. Average packet delay
3.5.3. Control traffic volume3.5.4. Route acquisition latency; 3.6. Conclusion; Chapter 4. Quality of Service in MANETs; 4.1. Introduction; 4.2. QoS: a definition; 4.2.1. QoS in wired networks; 4.2.1.1. The IntServ/RSVP approach; 4.2.1.2. The DiffServ approach; 4.2.2. QoS in wireless networks; 4.2.2.1. QoS models; 4.2.2.2. Signaling; 4.2.2.3. Routing with QoS; 4.2.2.4. MAC layer; 4.3. The OLSRQSUP protocol and QoS extensions; 4.3.1. Operation of the protocol; 4.3.1.1. Delay; 4.3.1.2. Bandwidth; 4.3.2. Sensing of neighborhood QoS parameters; 4.3.2.1. HELLO message extensions
4.3.2.2. Format of information base extensions

Sommario/riassunto

This work presents ad hoc networks and their characteristics. It explains a new protocol of routing with QoS as well as its implementation in a network simulator and compares it with the existing protocols. The book discusses the principle of the load balancing, treats the approaches of optimization of energy, and proposes a new approach with an analytical model that gives a better performance.
